

GuestCast

Wireless Media Hub for Hospitality

PalVision's GuestCast is the most complete Wireless Media Hub in the market, with support for Miracast, AirPlay & Chromecast technology in one single bundle.

From TV channels, movies and music to photos, games, documents and more – your guests have a world of content in the palm of their hands.

Allow your guests to feel at home by streaming their own content to guestroom TVs – from any device!

EASY

Guests use their own personal devices. There are no wires, complicated setups or remote controls. There is nothing to download. Guests simply pair and start streaming

COMPLETE

GuestCast enables Guests to mirror their Android and Apple devices, and enables them to stream their favourite free and subscription content from 1,000+ apps, making it a complete Guest Room Entertainment solution

SECURE

Guest's do not need to enter personal information into the TVs and wireless streaming is isolated within each guest room

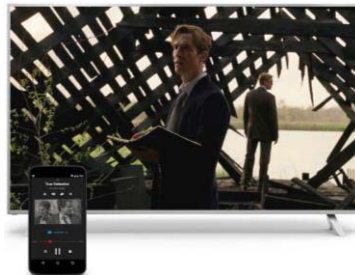

UNIVERSAL

Comprising Miracast, AirPlay and Chromecast for subscription TV services, GuestCast is a multi-platform solution that accepts streaming connections from smartphones, tablets, laptops

AirPlay

Cast

Miracast

The Solution* comprises

- ~ **GuestCast Media Hub**
PalVision's PalNano GuestCast Receiver * or PalNano Zero mounts behind a TV or desk
- ~ **Cast Streaming Engine**
Cast stream distribution and management server
- ~ **Existing In-Room TV**
Normal or Smart TVs with a free HDMI port
- ~ **Guests' own devices**
Smartphones, tablets & laptops

* GuestCast Media Hub also serves as an in-room Interactive TV system hub and IOT device

Easy for Guests

Guests simply scan a QR code or navigate using a Remote Control* to redirect to GuestCast. Depending on the configuration, Guests either connect to Guest WIFI or the secure private WIFI and follow the on-screen instructions. Everything is controlled right from the guest's own phone, tablet or laptop. They don't need to enter a username and password nor download any app.

* The remote control of the Interactive TV system

- LAUNCH ① Redirect to GuestCast
- JOIN ② Connect to WIFI
- PAIR ③ Pair Device to GuestCast
- STREAM ④ Start Streaming

Easy for Hotels

GuestCast can be installed standalone or alongside your existing Interactive TV system, in select rooms or the entire Hotel, the choice is yours. Using wireless? Connect GuestCast to your WIFI connection. Don't wish to utilise your existing Guest WIFI connection? GuestCast also has its own in-built hotspot to create a Personal Area Network.

And if GuestCast is offered standalone, Guests do not need to navigate to various on-screen options using remote controls or other hardware. A simple QR code and web page will automatically redirect Guests to their preferred streaming option and reset to TV source afterwards.

Make It Yours – For Free

From adding your logo, to background image, text and buttons, GuestCast is customisable to reflect your own branding and “look and feel” – without incurring charges.

Basic Requirements

GuestCast does not require much, just the basics which are already pre-existing:

- ~ In-Room TV with spare HDMI input, preferably Hospitality grade TV
- ~ Mains outlet
- ~ Ethernet or WIFI connection

Compatible Devices

GuestCast is compatible with virtually every device your guests travel with – from Apple iPhones, iPads, Macbooks, Android tablets & smartphones to laptops that support Windows Project and any laptop that is running Chrome browser.

Welcome Screen

If you do not have an Interactive TV system, we can supply a custom media player with Hotel Video and graphical overlay to notify your guests of the GuestCast service, eliminating the need to print out instructional pamphlets.
