SEVERAL HOTEL MANAGEMENT APPLICATIONS

RISTV provides several key hotel management applications, all controllable by CMS designed to ensure maximise efficiency, save cost and improve staff productivity

Service Requests

Allows your guests to interact with the complete range of facilities and services on offer at your hotel including requesting any service such as amenities requests and more.

Paperless

Offers a fully digital and paperless means to offer your services to your guests, thereby saving time and costs associated with printing in-room collaterals.

Useful Information

Provides your guests with access to key information such as local weather forecast, flight information city guide and more.

Bill Review

Allows your guests to view the bills, so they may check and be updated on what they need to pay for complete transparency.

Guest Messaging

Offer real-time digitized surveys to support and enhance your service recovery initiatives.

Integrations

Can be integrated with a myriad of services and systems including PMS, POS, RMS and more within your environment so as to enable you to reduce overall count, increase revenue, optimise services and thereby improve the guest experience.

Content Management Platform

Supported by a web-based app management system which can be accessed from anywhere to instantly update your content.
